## SUMMARY

Motivated and detail-oriented fresher eager to start a career in full stack development. Strong foundation in building responsive and user-friendly applications, with good problem-solving skills and a willingness to learn new technologies. Committed to delivering quality work and continuously improving skills.

## PROJECTS

- Dressora [E-commerce]

Dressora is a modern and responsive clothing website designed to provide a seamless online shopping experience. The project showcases a variety of fashion products with an attractive and user-friendly interface. For storing the data Firebase API is used. It includes features such as product listings, category-based navigation, and interactive elements to enhance user engagement. Language: React.js, HTML, CSS.

- The Sellora [Multi-Vendor Accessories E-Commerce Platform]

Sellora is a full-stack multi-vendor accessories e-commerce platform using Django REST Framework and React with JWT authentication and role-based access (Customer, Owner, Admin). Built product management, shopping cart, fake payment, and order tracking features stores in PostgreSQL. Integrated Celery, Redis, and Gmail SMTP for automated cart reminders and transactional emails, with a fully responsive custom UI.

- Musify [Social Media]

Musify a full-stack Spotify-inspired music streaming platform using Django, React, JWT, and PostgreSQL with role-based access for Users, Artists, and Admins. Built a music player featuring play/pause, next/previous, shuffle, repeat, and real-time progress controls. Implemented playlists, liked songs, and a personal library, while Artists manage tracks and Admins oversee content and users. Designed a responsive Spotify-style UI with seamless navigation and secure JWT-based authentication.

- CareCloud [Hospital Management System]

CareCloud is a full-stack hospital management platform built with React, Django REST Framework, PostgreSQL, and JWT authentication, featuring role-based dashboards for doctors, staff, and pharmacy teams with real-time appointment and consultation tracking, auto-generated staff and patient IDs delivered via automated email notifications, weekly doctor availability scheduling for staff coordination, and an automated pipeline that routes completed consultations directly into pharmacy orders.

## INTERNSHIP

Completed the eight months course of Python FullStack in the IDM TechPark. (2025-2026)

Android Developer Intern - Completed a 3-month online internship supported by India Edu Programs through EduSkills.

## EDUCATION

KSR College of Engineering, Autonomous, (Affiliated to Anna University) 2021-2025  
BE Computer Science And Engineering | CGPA: 7.9%

Vani Vidyalaya Matric Higher Secondary School 2020-2021  
Higher Secondary Certificate | Percentage: 88%

Vani Vidyalaya Matric Higher Secondary School 2018-2019  
Secondary School Leaving Certificate | Percentage: 89%

## CO-CIRRICULAR

Complete the ICT Academy Learnathon six courses in online with different companies like Microsoft, Google, Celonis, Bentley. | Complete the Cloud Computing in NPTEL with the 65%. | Complete the Compiler Design in NPTEL with the 65%. | Complete the Introduction to Internet of Things in NPTEL with the 78%.

## TECHNICAL SKILLS

Languages: Python, Javascript, HTML, CSS | Frameworks: Django | Libraries: React.js
